Device installation cups and installation devices
Assembly instruction
Device installation cups and installation devices

Assembly instruction

Device assembly container for locking into an assembly unit. For up to four installation devices for heavy current engineering or three installation devices for data systems technology.

1 | Cover plates
Choose cover plates according to the requirements. Break off edges at the perforation if needed.

2 | Safety sockets
Snap safety sockets into the corresponding cover plate.

3 | Strain relief
Insert the four enclosed strain reliefs into the side openings of the device container and equip them with the fixing bolts.

4 | Cables
Insert cables from Ø 6 to Ø 13 mm and fasten the bolt.

5 | Assembly
Install all components. Snap cover plates into the device container.

6 | Equipment
Equip empty spaces with dummy covers. Use tools for mounting and demounting of dummy covers.
Device installation cups and installation devices
Assembly instruction

7 | Installation
Insert the device container as far as possible into the lock-in leads. Can be lowered down to 30 mm.

8 | Minimum / Maximum installation height
Minimum installation height 74 mm without device plugs and 88 mm for device plugs up to H = 35 mm. Maximum installation height 104 mm for device plugs up to H = 50 mm.

9 | Releasing device cup
Push mounting lever or screwdriver between frame and device cup. Release latches separately sideways and take out device cup.

10 | Device separator
In case of different electric circuits and equipment use the device separator. Insert overvoltage protector into the push-terminals L, N and PE of the socket and complete with connecting line.

11 | Coulter clip installation devices
Lock in socket and overvoltage protector with the cover plate into the device cup. Screw installation devices with coulter clips into the device cup.

12 | Finalisation
Snap cover plates and screw cover in place. Close all openings with blind covers.

13 | Equipment of device cup
Quadrangular insert for half a device cup made of coated metal for components of data, fibre optic cable, audio and video technology, also for plug-in components and installation devices 45 x 45 mm. Equip with up to two plug-in components according to the manufacturer’s specifications and screw into the device cup.
