Shuttering unit, quadrangular
Assembly instruction
Shuttering unit, quadrangular
Assembly instruction

1 | Levelling of shuttering unit
Provide openings 261 x 261 mm or 261 x 186 mm in the assembled basic floor.

2 | Fixation of shuttering unit
Level the shuttering units on the hollow floor before applying the screed.

3 | Mounting of foil
Fix shuttering units to the floor with adhesive tape, cut out foil and overlap.

4 | Inserting screed
Spread the screed on the whole area and compact it neatly.

5 | Cut out opening
After the screed has hardened remove the overlapping lid and sidewalls neatly. Side walls must be maintained.

6 | Mounting assembly unit
After the floor covering has been laid insert the installation unit straight into the opening and fasten it with the claws evenly to the screed.
