Cartridge units made of stainless steel, quadrangular
Assembly instruction
For wet maintenance floor covers such as stone covers, only a tube cartridge unit may be used. However, the floor cover depth must be considered. Insert the replaceable cartridge into the frame. The tube can be screwed. Observe the potential equalization.

For damp maintenance floors such as parquet covers, use a dummy cartridge unit or a cable outlet cartridge unit. However, the floor cover depth must be considered. Insert the replaceable cartridge into the frame. Observe the potential equalization.

Mount both lock-in leads with two screws each on the side of the frame. Create grounding connection between levelling device and floor box. When using a coupler plug $H = 35$ mm, comply with the minimum installation depth $H_{\text{min}} = 95$ mm.

For damp maintenance floors such as parquet covers, use a dummy cartridge unit or a cable outlet cartridge unit. However, the floor cover depth must be considered. Insert the replaceable cartridge into the frame. Observe the potential equalization.

For wet maintenance floor covers such as stone covers, only a tube cartridge unit may be used. However, the floor cover depth must be considered. Insert the replaceable cartridge into the frame. Observe the potential equalization.
